

## Technical Data Sheet

### Product Information:

### ABSORPTION INSERT

#### Description:

The Eaton Filtration Absorption Insert is the ultimate solution for an increased oil removal capacity. The insert can be installed in most standard size 02 filter bags with SNAP-RING® and SENTINEL® ring collar and provide for a multiple increase in dirt and oil removal capacity. It will not fit into PGF, LCR-500 and LCR-130.

It is necessary to equip these elements once installed with a Stainless Steel cover plate for optimal efficiency and capacity.

For an easier fit and removal of the element, the use of a Eaton Filtration straight-sided perforated plate basket (without the indent) is highly recommended.

#### Materials of Construction:

##### ABSORPTION INSERT:

Filter Media: Polypropylene (meltblown)  
 Extruded Core: Polypropylene  
 Assembly: Polypropylene (perforated spunbond)

##### CHARGING RING:

Stainless Steel 1.4571

#### Nomenclature / Item Codes:

ABSORPTION INSERT Size 02-04X      F5873279

CHARGING RING      F671239
